INTRODUCTION

Simplicity

We are in the business of simplifying everyday life – with well-considered products that are functional and beautiful and most of all – stunningly simple. Simple to use, simple to clean. So simple, that they consume a bare minimum of energy, if any – most of our coffee and tea makers don't come with a power plug – and so simple that they generate the smallest amount of waste possible. Life is complicated enough your everyday pleasures shouldn't be.

Over the years we've been rewarded for these efforts with numerous design awards from all over the world. While we take great pride in these awards, the loyalty of our customers is far more rewarding. Our customers recognize and love us for who we are – a company that has stuck to its "design follows function" philosophy while reinventing "Modern" for the 21st century.

Our products add a touch of elegance to any restaurant, café or hotel setting; from our coffee and tea makers, our drinkware and table top collections, to our outdoor and in room products.

1 PAVINA Double Wall Glass

COFFEE

BODUM® was founded in 1944 by Peter Bodum. Launching a new business during the war wasn't easy, and jobs were scarce, but my father sensed it was time to venture out on his own. He was incredibly fortunate to be granted an import license, and by the late 1940s he had achieved great success. As he looked to grow the business, he found new interest in coffee makers. The company's first vacuum coffee maker, MOCCA, was introduced in the early fifties, but it wasn't until 1958 with the production of the SANTOS Vacuum Coffee maker that BODUM® became a household name for quality coffee products, and coffee has been the major product group for BODUM® ever since.

In the 1970s we introduced the now iconic French press, which continues to be BODUM®'s most popular item. Today, the majority of BODUM® coffee makers are produced at our factory in Portugal, where producing the highest quality products as well as environmental responsibility and safe working conditions are of the utmost importance.

In the years to come we are focused on expanding BODUM®'s factory in Portugal and moving more and more BODUM® products there, this move will make the entire process from design to manufacturing a family operation. Another important part of the BODUM® line is our collection of electric products that have been introduced over the past few years. Centered around coffee, from boiling water to grinding beans to the perfect automatic brew produced by our BISTRO Automatic Pour Over Coffee Machine, the collection encompasses everything the modern kitchen might need.

But no matter how much we grow, we will always reflect on our core value that form should follow function.

— Jørgen Bodum

COFFEE BREWING METHOD

French Press

The French press coffee maker is the simplest of all brewing systems, where coarsely ground beans meet hot water right off the boil. The right temperature (92–96°C, 195–205°F) brings the optimal extraction power for the essential oils in the beans to develop their full flavor profile in just four minutes. An easy press on the plunger locks the grinds at the bottom of the glass carafe and stops the brewing process. **CHAMBORD®, p. 5**

4 Minute Brew Time

Cold Brew

Quality cold brewed coffee can be made using essentially the same steps. Instead of hot water, add filtered water at room temperature and stir. Place the lid on the carafe and let brew for 12–24 hours at room temperature or in your refrigerator. Press and enjoy!

12 Hour Brew Time

Pour Over

The pour over brew method features a fine mesh stainless steel filter that eliminates need for paper filters. Paper filters actually absorb the coffee's essential oils hence robbing coffee of true flavor, plus no paper filter means no waste! **POUR OVER, p. 17**

4 Minute Brew Time

Note: For the French press and cold brewing methods, BODUM® recommends a coarse grind. For the pour over brewing method, BODUM® recommends a medium grind.

 No paper filter!
 No capsule!

1 CHAMBORD® Stainless Steel French Press

FRENCH PRESS

CHAMBORD®

CHAMBORD® is a true original. The iconic design, now synonymous with the BODUM® name, dates back to the 1950s. To this day we continue to produce the CHAMBORD® with the same artisan craftsmanship of yesterday, but with a focus on environmentally responsible manufacturing in our BODUM® owned factory in Portugal. The French press system continues to be a greener way to brew coffee with the truest flavor possible.

1 PAVINA Double Wall Tumbler

FRENCH PRESS

BODUM® COLUMBIA

The BODUM® COLUMBIA Coffee Makers are made of double wall stainless steel which means that your coffee stays hot much longer. The air in between the two walls provides a highly effective layer of insulation. The COLUMBIA is not just any nice looking coffee pot: It is a coffee press. After all, you would not want to compromise taste for beauty. And it works just like any of our coffee presses.

POUR OVER

POUR OVER

The POUR OVER promises excellent, rich taste and robust aroma while maintaining the natural oils of the ground coffee. For the perfect cup of coffee, simply fill the cone-shaped filter with freshly ground coffee and pour a small amount of heated water over them until soaked. Slowly pour the remaining hot water into the filter. Coffee will drip into the mouth-blown, borosilicate glass carafe and, in 3–4 minutes, will be ready to serve. Remove the filter from the carafe before serving and enjoy!

TEA

No wonder tea has been the most popular drink after water for centuries. Black teas, white teas, green teas, herbal teas, fruit teas, rooibos teas – the options for pleasure and delight are simply limitless. We have the right tea maker for all of your tea preferences, including iced tea.

Tea brewing doesn't get any purer than with the BODUM® tea presses. With this unique system your tea is brewed precisely to your desired strength and aroma. We developed the tea press in collaboration with the English Tea Council over 30 years ago and we've been perfecting it ever since.

BODUM® tea presses are made of the highest quality borosilicate glass – a material that doesn't stain and is absolutely neutral in taste. The glass allows you to observe the brewing process and stop it when it's exactly right. It's just fascinating to see all the beautiful tea colors come to life. The BODUM® tea presses are as much a pleasure for your eyes as they are for your taste buds.

Our collection of various infusers are the perfect match when brewing green teas, rooibos teas and herbal teas which have become more and more popular. Here, the brewing process does not necessarily need interruption and the leaves can be left to swirl freely in the infuser to develop their full flavor. The filter with the tea leaves inside can be removed to stop the brewing process and used again to re-infuse quality loose leaf tea a second time. Green tea for example can be reused for up to four times, taken that it is a high quality loose leaf tea.

TEA BREWING METHOD

Tea Press

The tea press utilizes the same brewing system as the French press to allow for full control of the tea steeping process. Once your preferred coloring and strength is reached, you simply press down the plunger and seal the tea leaves into the bottom part of the filter that has no holes. This makes the brewing process stop with one easy push and you can discard or re-use the tea leaves after you have enjoyed your beverage. Silicone rim secures filter firmly into the teapot and stays cool to the touch for safe removal. **ASSAM**, p. 23

Note: All loose leaf teas are suitable for the BODUM® tea press. The tea press works best with fruit teas and black tea because it interrupts the brewing process – avoiding bitterness.

Teapot And Tea Infuser

Tea leaves can be left to swirl freely in the infuser to develop their full flavor, and can be left to brew without interruption. The filter, along with the tea leaves, can be removed at any time to stop the brewing process and can even be used a second time to re-infuse quality loose leaf tea. The highest quality green tea, for example, can be reused up to four times. **CHAMBORD®**, p. 25

TEA PRESSES

BODUM® COLUMBIA

BODUM® COLUMBIA pairs utility with timeless elegance. Highly polished stainless steel and classic design make this the perfect choice for entertaining and gifting. The French press brewing system allows for full control over the tea steeping process. The silicone plunger locks the tea leaves into bottom of the filter once brewing is complete, cutting off access of water to the tea leaves. This allows tea to be used multiple times.

TEA PRESSES

ASSAM

The ASSAM Tea Press is the icon among the wide variety of BODUM® Tea Presses. Its classic round shape and borosilicate glass let all teas shine in their best light. Contrary to non-transparent pots, the glass pot allows the distinct color palates to be viewed as they are a big part of any tea lover's delight. There is also a very practical reason for making glass the preferred staging ground for your teas: You have precise control over the extraction and strength of the tea as the color's intensity indicates how far along in the brewing process.

BODUM® premiered its line of double wall glasses in 2002. The inventive design coupled with timeliness style made these glasses an instant classic. Over the past ten years, the collection has earned numerous awards and expanded to include a variety of styles and sizes. Made of heat-resistant borosilicate glass, and individually mouth-blown by expert artisans, the double wall construction creates a highly effective layer of insulation. Hot drinks stay hot longer, while the glass remains cool to the touch, and cold drinks stay cold without producing messy condensation. The result is endless serving possibilities.

The patent pending hydrophobic silicone vent at the bottom of each glass equalizes pressure within the walls of the glass with the outside air pressure. The glass will self-adjust to any temperature liquid, and the vent is only permeable to air, not water, so whether your beverage is hot or cold it will never allow fluids into the interior of the glass layers.

Our new collection of unbreakable Outdoor Tumblers, allows you to entertain with BODUM® classic design silhouettes at your next BBQ or poolside gathering!

These Outdoor Tumblers have the same thermal properties as our glass versions, so your hot drinks will stay hot and cold drinks will stay cold for a longer period of time and with no messy condensation rings to worry about! Crystal clear design for the outdoors. We'll toast to that.

The BODUM® Double Wall Glasses have won the following awards:

Double Wall Glass

Double wall glasses that breathe! A silicone vent at the base of each of BODUM®'s Double Wall Glasses equalizes the air pressure between the two layers of glass when either hot or cold liquids are added. Permeable only to air, never water, the vent enhances durability and will never allow liquids to enter between the two layers.

Use & Care

Every double wall glass is mouth-blown by expert artisans, and therefore each may have slight differences in height, thickness, and weight. To preserve the longevity of the glass, please keep in mind the following:

THERMO JUGS

Thermo Jugs

Thermo Jugs are a must have necessity because they're vacuum sealed, double wall construction offers the ability to keep batches of liquid or soups hot or cold for an extended period of time.

BISTRO

Thermo Jug

This BISTRO Thermo Jug opens with an easy one-handed press on the lid to let the fluids flow. The lid closes automatically after each use. Ideal for serving or outdoor picnic.

OUTDOOR / POOLSIDE

BODUM® has an array of BPA-free plastic products that are perfect for outdoor and poolside service. Our new collection of unbreakable Outdoor Tumblers, allows you to serve with BODUM® classic design silhouettes. These Outdoor Tumblers have the same thermal properties as our glass versions, so your hot drinks will stay hot and cold drinks will stay cold for a longer period of time and with no messy condensation rings to worry about! Crystal clear design for the outdoors. We'll toast to that.

2 BODUM® CANTEEN Double Wall Outdoor Tumblers

1 KIRA Wine Cooler

OUTDOOR / POOLSIDE

Double Wall Outdoor Barware

COOL
Double Wall Ice Bucket

BPA-Free material
The double wall construction provides optimum insulation and eliminates messy condensation. Matching tongs are neatly stored within the lid design for easy access.

11584-913 Bucket & Pincers,
1.5l, 51oz

KIRA
Wine Cooler

BPA-Free material
The KIRA keeps bottles cooler for longer. The double walls have an insulated effect and will withhold the temperature for a much longer period of time than a single wall.

IN ROOM

BODUM® has a collection of in room products that are both sleek and functional. Our BISTRO Blade Coffee Grinder is small and compact in design so it takes up minimal counter space. Its easy, push-button control allows for pulse action or continuous grind and the strong, durable stainless steel cutting blade spins at a precise RPM. The Burr coffee grinder is another space-saving gadget. It holds an amazing 220gr of coffee and therefore allows for larger quantities in one go. Twelve settings allow you to grind from a coarse French press to a fine espresso with the ability to micro-adjust between settings.

These grinders are a perfect compliment to our the BISTRO Water Kettle. The electric BISTRO Water Kettle was developed to boil water quickly and energy efficiently – ideal for coffee, tea and instant soups.

Tea and coffee can be stored in our PRESSO storage collection made from silicone and borosilicate glass. We offer other storage options, with lids available in wood and stainless steel.

1 BISTRO Blade Coffee Grinder
2 PAVINA Double Wall Tumblers

- Compact and small – this space efficient coffee grinder can easily be left on the kitchen counter.
- The transparent lid allows you to control the grinding progress – the longer the grind, the finer the grounds.
- The power cord can be tucked away within the grinder.
- Easy, push-button control allows for pulse action or continuous grind.
- Strong, durable stainless steel cutting blade that spins at a precise RPM.
- Convenient cord storage in base.

- This space-saving grinder holds an amazing 220 gr of coffee and therefore allows for larger quantities in one go.
- 12 settings allow you to grind from a coarse French press to a fine espresso with the ability to micro-adjust between settings.
- Programmable time function for even easier handling.
- The wide open funnel prevents spilling of the beans.
- Tightly fitting plastic lid keeps the grounds from spilling.
- Equipped with a friction clutch, preventing damage to the grinding gear by the presence of small stones.

1 BISTRO Burr Coffee Grinder

IN ROOM

Coffee Grinders

The Burr coffee grinder crushes beans between stainless steel conical burrs rather than slicing them which preserves bean's intrinsic flavor and aroma.

The Blade coffee grinder grinds coffee beans from coarse to fine quickly and efficiently with its strong, durable, stainless steel cutting blade.

- The inner glass wall is made of borosilicate glass, the outer one of transparent plastic. It protects the glass, insulates, and keeps you from burning your fingers.
- The kettle can be lifted off its 360 degree base and has a big opening for easy filling.
- The water only comes in contact with glass – the process is therefore BPA-free.
- The heating element is safely tucked away at the bottom of the kettle and doesn't get in contact with the water.
- Mesh-screened spout captures chalk while pouring.
- The transparent container makes it easier to control the water level. The scale line indicates liters, ounces and cups.
